SECTION A

INTRODUCTION TO OPENTYPE®

WHAT IS OPENTYPE?

OpenType® is a cross-platform font file format developed jointly by Adobe and Microsoft. The two main benefits of the OpenType format are its cross-platform compatibility (the same font file works on Macintosh and Windows computers), and its ability to support widely expanded character sets and layout features, which provide rich linguistic support and advanced typographic control.

OpenType fonts can be installed and used alongside PostScript® Type 1 and TrueType fonts.

The range of supported layout features may differ in the various FontFont OpenType packages, therefore each OpenType package will be accompanied by this FF Info Guide listing the layout features supported by this specific font package.

You'll find a glossary of all available OpenType layout features in Section B of the general FF OpenType User Guide.

Please see the FontFont OpenType® User Guide at http://www.fontfont.com/opentype

ABOUT FF THREESIX 10 108 BOLD

MuirMcNeil Design Systems is a collaborative venture between Paul McNeil and Hamish Muir. Their activities are focussed on exploring systems approaches to design for communication. Paul and Hamish wrote and designed U:D/R 03 ThreeSix, a research paper published by Unit Editions in 2010. In 2011, the ThreeSix type design project won two prestigious international awards, a Certificate of Excellence and a Premier Award, from The ISTD (International Society of Typographic Designers).

In his introduction to U:D/R 03, Wim Crouwel said: “Fascination is the key word that comes to mind when I study ThreeSix. It is a fascination for the use of geometric systems in design that has resulted in these remarkable typefaces.”

ABOUT HAMISH MUIR

Hamish Muir is art director of Outcast Editions, a new independent publishing company specializing in high quality, interactive digital books. He currently combines work as a graphic design consultant specialising in editorial, information and systems design with teaching at the London College of Communication. Hamish cofounded the design practice 8vo in 1985 and was co-editor of the international journal of typography ‘Octavo’. The 2005 Lars Müller publication ‘8vo: On the outside’, documents the studio’s influential work. Hamish is a member of the Alliance Graphique Internationale.

ABOUT PAUL MCNEIL

Paul McNeil is a London-based independent graphic design consultant specialising in type, typography and information systems. He works in Postgraduate Graphic Design at the London College of Communication and is Course Leader of MA Contemporary Typographic Media. Paul is a member of the International Society of Typographic Designers and the Higher Education Academy.
