SECTION A
INTRODUCTION
TO OPENTYPE®

**WHAT IS
OPENTYPE?**

OpenType® is a cross-platform font file format developed jointly by Adobe and Microsoft. The two main benefits of the OpenType format are its cross-platform compatibility (the same font file works on Macintosh and Windows computers), and its ability to support widely expanded character sets and layout features, which provide rich linguistic support and advanced typographic control.

OpenType fonts can be installed and used alongside PostScript® Type 1 and TrueType fonts.

The range of supported layout features may differ in the various FontFont OpenType packages, therefore each OpenType package will be accompanied by this FF Info Guide listing the layout features supported by this specific font package.

You'll find a glossary of all available OpenType layout features in Section B of the general FF OpenType User Guide.

Please see the FontFont OpenType® User Guide
at <http://www.fontfont.com/opentype>

ABOUT FF BASIC GOTHIC BLACK

Basic Gothic is a sans serif type family of eight weights plus matching italics. It was designed by Hannes von Döhren and Livius F. Dietzel in 2009/10. Influenced by the early sans serif typefaces of the 19th century and developed for today's highest standards, we created a functional family optimized for maximum legibility.

Basic Gothic has a functional, basic look, being willful but pleasant at the same time. The unique letter forms of Gill or Antique Olive inspired us to search for exceptional yet legible proportions. At the same time, the letters are stripped down to their basic forms, with precise curves and straight lines, making Basic Gothic extremely versatile for a multitude of applications. Basic Gothic performs especially well in small sizes.

The heavy weights have stronger contrasts and unfold their strength in bigger sizes. They have an eye-catching appearance in newspaper or magazine headlines.

Basic Gothic is equipped for complex, professional typography. The OpenType Pro fonts have an extended character set to support Central and Eastern European as well as Western European languages. Each font includes small caps, fractions, old style, lining and tabular numbers, scientific superior/inferior figures, alternates and a set of arrows.

ABOUT HANNES VON DÖHREN

Hannes von Döhren was born in Berlin, Germany in 1979. After completing his studies (graphic design) in 2005, he worked in an advertising agency in Hamburg, Germany. Since 2007 he has been working as a freelancing art director in Berlin, which allows him to spend some of his time developing fonts as well. In 2008 he made his passion to his profession and founded his own type foundry HVD Fonts. Within the last years he released several type families like Brevia, Brandon Grotesque or Cowboyslang.

**ABOUT
LIVIUS DIETZEL**

Born in 1979, Livius Dietzel studied Visual Communication at the University of the Arts, Berlin from 2003 to 2008. During this time, he also studied at the Universitat de Barcelona and the London College of Communication. In summer of 2008, he completed his graduation thesis in Prof. Fons Hickmann's Graphic Design Class. Since 2003, Livius has been working as a freelance Art Director, and since 2008, he has also been part of the team at MetaDesign Berlin. For his work he has won prizes such as the Red Dot, the IF Award and the TDC Certificate of Typographic Excellence. His latest type designs are ITC Chino and Livory. FF Basic Gothic is his third type family he designed in collaboration with Hannes von Döhren.
